

PINIENSTREU

Clumping natural litter

**Clumping cat litter made of 100% organic products!
Highly effective, dust-free, able to be disposed of in
the toilet!**

Anifit's Pine Litter fulfils two important requirements for cat hygiene:

a) Hygiene

Anifit's Pine Litter is highly effective and can be used very sparingly. The litter is highly odour-absorbent meaning no unpleasant smells remain for the cat.

Anifit's Pine Litter is extremely well received by cats thanks to its natural woody aroma. No dust or adhesive effect occurs during use.

b) Ecological product

Pine Litter is manufactured using the bark of pine trees and is 100% biodegradable and also 100% compostable. The product contains no chemical components or aromas and is produced without any pressing additives.

- 100% natural pine wood
- 100% compostable and entirely biodegradable
- Produced without pressing additives
- Natural wood aroma
- Extremely absorbent
- No dust or adhesive effect
- Disposable in the toilet

- Highly odour-absorbent
- Without chemical additives or aromas
- Very high-yield and highly effective
- Clumping

Anifit tip

Always provide one litter tray for each cat where possible. Cats use their litter trays more carefully when they are not forced to share with other cats.

Familiarisation

If the cat unexpectedly does not immediately take to using the new litter, simply combine this with some of the old litter and reduce this amount on a day by day basis.

Application

Remove clumps and solid excrement daily using a special shovel and dispose of these in the domestic waste or via the toilet. The litter tray should be completely emptied and cleaned once every six weeks.

Other accessories

With the Anifit cat litter shovel, the clumps can be effortlessly and cleanly removed and disposed of.
